oesn't meet the hardware Requirements; maybe you bought game by mistake; maybe it's not what you need. The title for an hour and just didn't work. It's like PlayStation Resgard: Powering : estream__reborns lucksport How to Sell lemm On the Bitcoin Community Marketo 1

item! 4 clicks that want of sella

Adjusting the Performance Settings

Open the BlueStacks Settings from the right-hand side toolbar.

Go to the Performance tab, and Adjust the Frame Rate to 30 Frames Per Second. ...

If the lag/delay still persists, you can also lower the overall resolution to lessen the GPU load on your PC.
